6) Read this passage then answer the questions below:

Many Professional sport teams have recently added a new member to their organization . That's because athletes have become aware that food affects performance . You don't have to be an athlete to notice this effect . If you 've never skipped breakfast and then tried to increase your physical performance .

You have have to eat enough food as your body needs a certain number of calories each day . If you're this . you 'll often feel tired you 'll be more likely to get sick . You have to avoid eating foods that are high in simple carbonhydrates , that is , sugars . A chocolate bar will first give you energy , but then it will leave you feeling even more tired .

A pound of any certain kind of food will give off a certain amount of heat energy which is measured in calories each day . If you eat much more than you need , The extra part is not burnt up . Instead it is rather fat have watched their calories.

Eating a balanced diet , one that includes complex carbohydrates , protein and fat will help you decide how much to eat of each type of food . Complex carbohydrates provide the body with " fuel " . **They** are found in fruits and vegetables , and in bread . rice and other foods made from grains . The body uses protein to build muscles , and it uses fat to absorb the vitamins in food . Protein and fat are found in foods like , cheese , meat , fish and eggs . Too much fat , however , can be harmful .

A) Answer the following questions:

- 1- what do we need food for ?
- 2- How is heat energy measured ?
- 3- what does a balanced diet include ?
